

23 March 2015

Mr. Hiren Bafna,  
Founder  
Digital Technologies

Dear Hiren,

My name is Alhad Oak, one of the co-founders of LegalLogic a law firm specializing into Corporate and IT Legal matters.

I have used Digital Technologies services since 2009 for various needs for my organization and for my clients too. As recently as last week, my laptop crashed and I lost my personal data. The data is not recoverable that was feedback from one of my friends. I said if someone can run magic and recover data, it will be only Digital Technologies. I am happy to say that most of my data is recovered. The data was worth my past 6 years of memories in terms of family photographs, my personal data including tax returns, bank account statements and all other personal financial matters.

I thank you for being such a reliable support to LegalLogic and to me as friend and guide. I wish you and your team at Digital Technologies a great success. I will always recommend your services to my friends and relatives.

Thanking you.
